

SAFE ROUTES TO SCHOOL FRANKLIN ELEMENTARY

A pedestrian refuge and crosswalk will be installed at the intersection of Washington Ave and 25th St. The new design will improve safety and vehicle compliance in yielding for pedestrians, especially for the many students who walk to and from Franklin Elementary.

DESCRIPTION OF ELEMENTS

- 1 Pedestrian Refuge**
Located along the street centerline, the refuge narrows the travel lanes making it more comfortable to cross the street.
- 2 Off-set Crosswalk**
Sometimes called a Danish Crossing, the crosswalk will be off-set to accommodate the existing conditions of the intersection and curb ramps.
- 3 Pedestrian Lighting**
A light pole will be installed to illuminate the crosswalk and make pedestrians more visible.
- 4 Signage and Striping**
"Yield to Pedestrians" signage, advanced striping and markings will be added to help improve yielding compliance.
